St. Anthony's Fire

Warren Dotz, M.D.

Among the many epidemics that ravaged Europe in the Middle Ages, none was more dramatic than St. Anthony's Fire, a severe systemic toxic reaction to the ingestion of rye grain contaminated with an ergot-producing fungus. More recently, the term "St. Anthony's Fire" has also been used for erysipelas as an eponymous expression. Examination of written and artistic historical material reveals that

form or the other and rarely with a mixture of features. Descriptions of the two forms of ergotism have been derived from observations made during the great epidemics when victims ingested combinations of ergot and other unknown substances. To this day convulsive ergotism is not encountered following use of pure ergot compounds. Signs common to both the gangrenous and con-

President's Message

by George Lobue

Dear computer club friends,

April is our happy tax month. I wish I felt better about how our politicians are spending it. Unlike our congress, your club *does* have a budget and your board watches it very carefully. Everyone tells me that our \$10 annual fee is the best deal in Sun City, so share this news with your friends and neighbors.

I often get phone calls from folks asking what day of the month we have a Computer class. Thanks to all you volunteers, callers are surprised and happy to hear all they get for the \$10 dues. It still surprises me that we do not have 3000 club members. You all should know that all new residents get a nice write up about our club activities when they move into our community.

Remember to mark your calendars for the 1st Thursday of every month for our 7 PM Computer Club meeting at Desert Vista.

TECH NOTE: My recent IBM annual report shows that they get considerable revenue for assisting customers with projects to accumulate and analyze the tons of information they get from the Internet and all the mobile devices. Now you know why you get all those pop up ads, carefully created from this analysis just for you. Remember that all your new smart phones and tablets are not very private. They tell a lot. So be careful what you put out there.

The latest concern is a project called **Google Glass**. Think about a pair of eye glasses that can do everything your smart phone does using voice commands to operate. If you see someone with glasses looking at you at the store or ATM, they may be taking a video of what you are doing. WOW! Relax though. The news letter from Tech Republic says that these glasses from Google are not expected to be available until the end of 2013.

Stay happy and healthy!

George Lobue, President

Mensaje del Presidente

por George Lobue

Estimados amigos del club de computación,

Abril es nuestro mes impuesto feliz. Me gustaria sentir mejor acerca de cómo nuestros políticos están gastando. A diferencia de nuestro congreso, su club *tiene* un presupuesto y su tablero lo mira con mucho cuidado. Todo el mundo me dice que nuestra cuota anual de \$ 10 es la mejor oferta en Sun City, por lo que compartir esta noticia con tus amigos y vecinos.

A menudo recibo llamadas de gente preguntando qué día del mes en que tenemos una clase de equipos. Gracias a todos te los voluntarios, las personas que llaman son sorprendidos y encantados de escuchar todo lo que pasa por la cuota de \$ 10. Todavía me sorprende que no tenemos 3000 miembros del club. Todos ustedes deben saber que todos los nuevos residentes obtener un buen escribir sobre las actividades de nuestro club cuando se mudan a nuestra comunidad.

Recuerde marcar su calendario para el jueves 1 ° de cada mes para nuestro Club de Computación 7 PM reunión en el Desert Vista.

Nota técnica: Mi reciente informe anual de IBM muestra que obtienen ingresos considerables para ayudar a clientes con proyectos para acumular y analizar las toneladas de información que obtienen de Internet y todos los dispositivos móviles. Ahora ya sabes por qué te dan todos los anuncios pop-up, cuidadosamente creado a partir de este análisis sólo para usted. Recuerde que todos sus nuevos teléfonos inteligentes y las tabletas no son muy privados. Cuentan mucho. Así que ten cuidado con lo que pones ahí.

La última preocupación es un proyecto llamado **Google Glass**. Piensa en un par de anteojos que pueden hacer todo lo que su teléfono inteligente es usar comandos de voz para operar. Si ves a alguien con gafas mirando en la tienda o cajero automático, se pueden tomar un video de lo que está haciendo. WOW! Relajarse sin embargo. El boletín de noticias de Tech Republic dice que estas gafas de Google no se espera que sea disponible hasta finales de 2013.

Permanezca feliz y saludable!
