# Upgrading to Lion (OS X 10.7)

## **Application Compatibility**

- In 1996 Apple changed from the *PowerPC* processors to The *Intel* processors.
- In order to ease the transition, Apple included *Rosetta* with the Leopard and Snow Leopard versions of OS X.
- With Rosetta, software written for the PowerPC machines cold run on the Intel machines.
- With Lion, Apple will not support Rosetta or software written for the PowerPC architecture.
- Before upgrading, users should check that any critical applications are compatible with the Intel architecture.
- There a two ways to determine if an application is Intel compatible.
- 1. In the Finder, right-click on the application then select *Get Info* from the menu.
  - Under the *General:* list, look at *Kind*: If it reads *Application (Intel)* or *Application (Universal)*, it will be compatible with Lion.

• If it reads *Application (PowerPC)* or *Application (Classic)* it will not be compatible with Lion.

- 2. Using System Profiler.
  - Click on the Apple Menu.
  - Select: About this Mac
  - Click on More Info...
  - Under Software, click on Applications. (Be patient.)
  - Look Under the column labeled Kind for the type of application e.g.
    - Intel
    - Universal
    - PowerPC
    - Classic

#### The General tab.

Select what items to display on the desktop.

(If the hard-drive icon seems to have disappeared from the desktop, check this setting.)

#### Always open folders in a new window

Use this setting to keep the current window open, when a new one opens.

#### **Spring-loaded folders**

When dragging an item to a folder, this controls whether to destination folder opens.

#### The Sidebar tab

Controls what items to display in the sidebar.

#### The Advanced tab

#### **Empty Trash securely**

Overwrites the space on the hard disk where the deleted files were located.

#### **Finder View Options**

Click on Finder -> View -> Show View Options.

#### Icon size

Adjust the size of the icons on the Desktop and the Finder windows.

0	Desktop	
lcon s	ize: 56 × 56	-

Sh	iow item info	
Sh	low icon preview	
Arran	ge by: None	\$

### Grid spacing

Icon spacing on the Desktop and the Finder windows.

#### **Label Position**

Bottom or Right.

#### Show icon info

Displays the file's size with the icon label.

### **Show icon Preview**

Displays the files contents (images) on the icon. (Can slow things down.)

### Arrange by

### Snap to grid

Keeps icons aligned.

#### Control the order in which items are displayed in the finder

Sort by name, size,date...
