Making a Video DVD From Your YouTube Downloads

1. Collect your YouTube (or other) video downloads into a folder.
2. If necessary, convert the videos to a common format, such as AVI, WMV, MP2, MP4.
3. Start your favorite video editor, such as Pinnacle Studio or Movie Maker.
4. Import your videos to the editor's clip library.
5. Drag and drop each clip to the timeline in the desired sequence.
6. Preview your video.
7. Adjust transitions, sequencing and timing as needed.
8. Add background sound as needed (most videos have a sound track).
9. Burn your video to either a blank DVD or to a video file.

News Bits

3) New Blu-ray disc format to double storage capacity

With an initial target of professionals in the broadcasting, medical and creative services industries, the Blu-ray Disc Association has introduced a high-capacity format called BDXL. The new format, which will more than double the storage of current discs, provides 100 GB of storage on rewritable discs and 128 GB on write-once Blu-rays. [Engadget](#) (04/03)

XpanD's 3-D glasses work with most 3-D TV models

Hoping to bridge a significant obstacle to rapid 3-D adoption by consumers, XpanD has come out with the X103 glasses, an active-shutter eyewear system that the company says works with most types of 3-D TVs. "While major television manufacturers are beginning to roll out their first 3-D-ready television models, a key to widespread adoption lies in the ability for consumers to use their 3-D glasses with any display that is capable of showing 3-D content," XpanD CEO Maria Costeira said.
